## Aching Bones,

pain in the back running up the spinal column to the base of the brain, eyes feverish and bloodshot, a stuffy feeling in the head, scalding discharge from the nose, sneezing, sore throat, cough, pain in chest-these are all signs of grip's ravaging effect on the nerves. Grip weakens the heart, congests the lungs, destroys the appetite and lowers the vitality of the whole system. The best and safest remedy for overcoming the depressing and prostrating effects of grip is Dr. Miles' Nervine. It invigorates the appetite, assists digestion, quiets the nerves and brings restful, refreshing sleep. It builds up the nerve tissues, overcomes the aches and pains, steadies the nervous heart and puts new life and energy into broken-down men and women as nothing else can.

"Four years ago I had a very severe attack of La Grippe, which settled in the back of my head and spinal cord. I had distressing pains in my head and back, my bones ached all the time and I became extremely nervous and restless. I could not sleep for days and nights together, my brain became seriously affected and I thought I should lose my mind. For two years my condition grew steadily worse and then I commenced taking Dr. Miles' Nervine. In a few days I was able to sleep naturally and continued to improve from that time on until my health was completely restored." Miss Sue Godwin, Opelika, Ala.

GUAM PUPILS PICK UP ENGLISH

What Has Been Accomplished in One

Nebraska, who has been superintendent of schools in Guam for the past year returning to the United States by the Naval transport Solace,

Mr. Hiatt organized the school system of Guam and introduced instruc-tion in English. "I think I can say that the results of instruction in English are very satisfactory, and they certainly are surprising. There are in Guam about 1000 children of school age. Six schools were organizel. At the be-ginning none of the pupils could speak English. Some of them might have picked up a few words from the sail-ors and marines. But that was all. At the end of a year all of them could ex-press themselves in English so that they could be readily understood, and they could understand English when spoken to them perfectly. The more advanced pupils during the year completed four elementary reading books. They were able to read them entire, to spell every word in them, to restate in English, but in their own English the substance of any of the stories in any of these books, and to write in tolerable English their own versions of the lessons learned. They knew the multiplication tables for the most part, in English, can add, substract, multiply and divide any part part and part of the substract in the substract and divide, and perform operations in simple fractions.

Notice is hereby given to agents with authority to issue marriage licenses, and to all persons authorized to perlate into their native Chomoro the things they read in their English textbooks, showing that they understand what they bave read. Then they are able to act as interpreters for English-speaking persons with the Chomoro-speaking persons. And it is the uni-versal testimony of the naval and marine forces at Agana that they can

speak and understand English,
"Of course it must not be understood
that they have acquired a mastery of
the language, but that the results of
instruction in English have been sur-

"When the schools were first organ-ized. Commander Swift, who was then in authority during the temporary ab-sence of Commander Schrpeder offered me an interpreter. I took him one day but never afterward. From that time there was nothing but English in the schools. I didn't learn the Chomoro nor even use those words and senten-ces which one naturally picks up. The teaching force used English only, our idea being to make them come to us in

language rather than that we should go to them.
"Unfortunately the schools cannot be "Unfortunately the schools cannot be immediately continued for want of funds. The necessity for a general hospital and a ieper hospital was so great that these had to be built. Congress failed to make any appropriation for carrying on the schools, and the uncertainty as to the tariff, from which a large part of the island revenue has been produced has so cut down the available funds, that the schools can scarcely be resumed sooner than six

"There is a doubt as to whether any tariff can be collected. All duties now and for some time have been paid to the collected. All duties now the collected to and for some time have been paid unno. der protest pending an authoritative
decision as to whether they can be legally collected. This practically ties
